

COOLING

Program

This program is for your AC or heat pump. Under the program, any accessories including filters, etc. are 15% off MSRP.

Maintenance

Maintenance is required once a year to maintain manufacturer's parts warranty

- Clean evaporator coil drain line
- Clean outdoor condenser unit
- Test air flow across condenser coil
- Test temperature across outdoor unit
- Test current draw on compressor
- Test current draw on condenser motor
- Test operation of condensation system
- Test operation of evaporation coil
- Test unit through operating cycle

MAPLE AIRTM
HEATING & COOLING

Protection

Labour & Parts coverage in the event of a unit breakdown

What is fully covered?

- Add-on indoor fan relay
- Add-on fan centres
- Capacitor
- Condensate pumps
- Condenser fan motor
- Cooling contractor/relay
- Fan blade
- Internal copper tubing
- Internal electrical wiring
- Pressure switches
- Service valves
- Shredder valves
- *Thermostatic expansion valve
- Low ambient temperature sensor

What is not covered?

- Refrigerant recovery, vacuum & refill

*What is partially covered?

- Evaporator coil
- Condenser coil
- Compressor

*Our liability, for parts and labor related to 'partially covered' units and services, is limited to a maximum retail value of CAD \$450 per year of plan coverage, inclusive of HST.

*The thermostatic expansion valve can be fully covered as long as it can be detached without causing damage to the coil.
